AI Generated Match Analysis:

The match result of Wolverhampton Wanderers 0 - 1 Arsenal aligns closely with the expected goals (xG) statistics, with Arsenal having a slightly higher xG value. This indicates that Arsenal's victory was deserved based on the quality of chances created by both teams. The simulation probabilities show that Arsenal had a higher chance of winning compared to Wolverhampton Wanderers, which was reflected in the actual result. Both teams performed close to expectations without significant over or underperformance, showcasing a competitive and balanced encounter.
